

LEVEL 2 - NATURALIST

DO ANY FOUR OF THE FOLLOWING

1	Keep a zoo of insects such as ants, grasshoppers, crickets or praying mantises for one week and observe/record their habits then return them from where you found them.	
2	Set up an aquarium or terrarium and keep it for four weeks using plants or animals you have collected.	
3	Make a migration chart showing the pathways followed by one migratory bird that visits Australia.	
4	Observe six animals, birds, reptiles, amphibians or mammals in their natural habitat. Describe the place where they were seen and what they were doing.	
5	Visit a natural museum, zoo, sanctuary or animal farm and find out about the purpose of the place visited and collection held.	
6	Look at a fossil in museum or geological display, draw it and explain what it is, how it was formed and how old it is.
