

## LEVEL 2 - GARDENER

1

	Do any four of the following:	
a.	Assist with caring for a garden, including vegetables, over a period of two months and record the progress on the plants and what you did, including ways you are <i>waterwise</i> in your care.	
b.	Explain what a hydroponic garden is and grow some plants under adult supervision.	
c.	Make a compost area for your family. Explain what you use in the compost and how you work it.	
d.	Set up a worm farm to assist your family with recycling and composting. Describe how worms and compost improve soil.	
e.	Learn how to prune and demonstrate pruning on a plant that requires it.	
f.	Discuss the use of chemicals in your garden including weed killers, pest controllers, fertilisers and soil additives.	
g.	Prepare a landscape sketch for around your home, showing the tree and shrubs and the types of garden you would have.
